PROJECTS

Mix & Sip

○ https://github.com/KaylaReid/mix-sip-midstone

Mix & Sip is single page responsive CRUD app built using React, JSX, JavaScript, CSS, SemanticUI, and JSON Server. Users are able to login, save drink mix recipes, track ingredients they have on hand, and add ingredients needed to a shopping list.

And sometimes switches in french and say "miaou" just because well why not walk on car leaving trail of paw prints on hood and windshield. Floof tum, tickle bum, jellybean footies curly toes scratch the box make plans to dominate world and then take a nap. Adventure always sit in a box for hours but poop in litter box, scratch the walls find a way to fit in tiny box chew foot.

ABOUT

I find software developing to be not only something that I enjoy, but something that challenges me daily to continue growing and developing my skills.

EXPERIENCE

Nashville Software School

July 2018-Present || Full Stack Software Developer Program

- Intensive full-time software development bootcamp focusing on full stack development fundamentals and problem solving. The bulk of the program executed in a simulated company environment with Scrum methodology.
- Hands on application of OOP fundamentals through group and individual projects reflecting real world business problems.
- Source code version control with Git/GitHub
  Project management/tracking with Github Projects & Issue Tracking.
- JavaScript fundamentals leveraging DRY, modular, readable code and reusable components.
- Built browser-based single page applications using React, HTML, CSS JavaScript, and jQuery.
- Task Automation with Grunt: Linting with ESLint, module bundling with Browserify.
- Styled applications with CSS Frameworks, Bootstrap, ReactStrap, SemanticUI, as well as wrote custom styles.
- Deployed applications through GitHub Pages.
- Leveraged VirtualBox for virtualizing a Windows environment.
- Learned unit testing to write testing suites for code
  Application design through white boarding dependencies and building ERD's.
- Created and modified database design/content using SQL, ADO.NET, and ORM tooling, including exposure and experience with migrations.
- Created RESTful APIs with C#/.NET using WebAPI.
- Leveraged Razor for creating and editing MVC applications.
